EDUCATION

Bachelor of Computer Technology

University of Computer Studies, Loikaw (2016 – 2019)

EXPERTISE

- Full-Stack Web Development
- Responsive UI
- CRUD Applications
- RESTful APIs
- Database-Driven Applications
- System Troubleshooting

CORE SKILLS

- HTML5
- CSS3
- JavaScript (ES6+)
- React.js
- PHP
- Laravel
- MySQL
- Git
- GitHub
- VS Code

SOFT SKILLS

- Analytical Thinking
- Cross-Cultural Adaptability
- Technical Documentation
- Team Collaboration
- Continuous Learning & Adaptability

LANGUAGE

- Burmese
- English

WORK EXPERIENCE

Experience at Remote

- Role: Frontend Developer
- Key Responsibilities & Achievements:
 - Spearheaded the development and optimization of enterprise-grade Web Dashboards, ensuring a seamless and high-performing User Experience (UX).
 - Implemented robust localization strategies to adapt applications for diverse regional markets and multi-lingual user bases.
 - Ensured high availability, stability, and optimal performance of production web applications through proactive server maintenance and monitoring.
 - Leveraged modern frontend technologies, including React.js and Ant Design (antd), to build scalable, maintainable, and responsive user interfaces.

Experience at Unitiy IT Solutions Company

- Role: Junior Full Stack Developer & Junior Frontend Developer
- Key Responsibilities & Achievements:
 - Developed robust and scalable web applications utilizing React for frontend architecture and Laravel for backend services.
 - Authored comprehensive technical documentation and user guides to enhance user adoption, while conducting technical training sessions for internal teams and end-users.
 - Actively analyzed user feedback and bug reports to drive continuous system improvements, feature enhancements, and rapid issue resolution.

Internship Experience at ROM Robotics

- Role: Software Engineering Intern
- Key Learning & Technical Exposure:
 - Mastered foundational Linux operating system administration, command-line operations, and system navigation.
 - Gained hands-on expertise in Version Control systems using Git & GitHub, facilitating efficient team collaboration and code management.
 - Explored containerization technologies such as Docker to streamline application deployment and ensure consistency across development environments.
